Dear Valued Business Partner,

**Introducing Our New Personal Accident Add-on: COVID-19/Dengue Hospitalisation Cash Benefit**

Many agree that the COVID-19 pandemic has adversely affected individuals and communities across the globe. Dengue is another on-going problem in Malaysia, as it can also be fatal in severe cases. When one has to be hospitalized for either of these viral infections, the daily life and routines of the individual and his/her family can be turned upside down. Even worse, there is a possibility that a person can be infected by both COVID-19 and Dengue at the same time, which will cause further stress and worry. Needless to say, hospitalisation is more than just an inconvenience.

In a difficult time like this, MSIG is here to lend a helping hand. We are pleased to introduce a new Personal Accident add-on: **COVID-19/Dengue Hospitalisation Cash Benefit**. It pays a cash benefit for each day that the insured is hospitalized for a confirmed diagnosis of COVID-19 and/or dengue fever, up to a maximum of 30 consecutive days. This benefit has a 14-day waiting period, and is only applicable for a **single occurrence of hospitalisation** during the period of insurance.

The COVID-19/Dengue Hospitalisation Cash Benefit comes with a choice of three plans at very affordable premiums:

Benefit	Plan 1 (RM)	Plan 2 (RM)	Plan 3 (RM)
<b>COVID-19 / Dengue Hospitalisation Cash Benefit</b> (per day, up to a maximum of 30 consecutive days)	100	200	300
<b>Annual Premium (RM)</b>	10	20	30

This benefit is available as an add-on for three of our existing Personal Accident products:

1. Individual Personal Accident (NPA)
2. Prime Personal Accident (PMA & PMB)
3. Group Personal Accident (NGA)

Our Account Handler will be contacting you soon to brief you on this product and we would like to take this opportunity to thank you in advance for supporting our PA Add-on: **COVID-19/Dengue Hospitalisation Cash Benefit**.
